Subject: Chat with Karen Lancaster
From: Karen Lancaster <lancaster.karen@gmail.com>
To: barriticus@gmail.com

10:55 AM **Karen**: What is the rose and arrows thing on your T/S post? I like it.
10:56 AM **me**: My personal symbol
and symbol of Project PM
10:57 AM rose is taken from Rose of House Lancaster
Karen: Wow! I was wondering if that was the case. VERY cool, who did it ifor you?
me: I did it
I learned how to use graphics programs
10:58 AM **Karen**: Well, I like it a lot. It's got a mystical, mysterious component that is very intriguing.
me: yep, that was the intention
Project PM is secretly a secret society
only I and few others know
even most of those participating will not know
11:00 AM secret goal is to encourage overthrow of all nation-states by getting the true elite - those who have gained erudition by way of access to the internet and thus most human knowledge - to corroborate on what is ostensibly a media reform organization
eventually, they will realize that they are superior to any government and may coordinate like a government for the first time in history
11:01 AM at least, to an extent similar but superior to that of the Freemasons
most of our Founding Fathers were Freemasons
Freemasons began as a secret revolutionary group to overthrow monarchies
11:02 AM but they didn't have the internet
Karen: Very interesting. I was just saying that the whole Google vs. China thing is a little like a sci-fi story, futuristic war where Google could be acting like a country, etc.
me: exactly
all of that was predicted
in cyberpunk stories
like Neuromancer
corporations and families taking real power
it has happened before, of course
11:03 AM our family was one of them
11:04 AM **Karen**: Yes! I believe Kermit has a lot of the genealogy links. Maybe you should ask him if he's done the Lancaster DNA Project? There is something going on there, not sure what.
11:05 AM The female DNA tests don't work but the males do. So we should have Kermit or

Stephen do it. (You can't as you're descended from a matriarchal side, where they are descended from male lineage.)

me: interesting

11:06 AM Thought we knew the major points

John of Gaunt

Karen: Yeah, but I think there is more going on there now, not sure but Kermit probably knows.

11:08 AM **me**: huh, I'll ask him
